Shooting setup for small subject. The table is made with COMBITUBE 80 cm **CONRO AS** on a lightweight folding tripod **COSNO AS**, topped by round accessory tray **COTIO**. 2 **STAPU** kits hold the lamps, whose light is mellowed by a **DUPLE** cone placed on **COTIO**.

Much more useful than its size suggests: hook adapter **CEPRO** holds cables safely away from the shooting area, as shown. Interchangeable sleeve **CEHUO** keeps it atop a COMBITUBE.
